

The Royal United Services Institute of Nova Scotia provides a forum for the study, promotion and debate of defence and security issues.

*Dispatches* is a weekly collection of links and news of current interest, included those tweeted and posted by the Institute on social media. The most recent four editions are posted to: <a href="https://rusi-ns.ca/dispatches/">https://rusi-ns.ca/dispatches/</a>. Note that links of articles are checked at the time they are put into *Dispatches*, but may be unavailable at a later date or in some states other than Canada.

If you are not a routine recipient of *Dispatches* but wish to be so, email the Institute's Chief Information Officer (CIO) at <u>RUSINovaScotia@gmail.com</u>. If you do not want to receive *Dispatches*, or wish to receive it at some different frequency, please inform the CIO. If you wish to receive *Dispatches* at a different email address (i.e., not your work address), please inform the CIO.

Everyone is encouraged to email to the CIO links and other content to be included in *Dispatches*.

Comments to articles can be from members or non-members of RUSI(NS). Feedback is welcome anytime. Any comment in *Dispatches* is the sole opinion of the author and does not necessarily represent the views of the Canadian Department of National Defence, the Canadian Armed Forces, the Royal Canadian Mounted Police or the Royal United Services Institute of Nova Scotia

RUSI(NS) also publishes a weekly *Defence & Security Newsletter*, aimed at opinion leaders and industry. The most recent four editions are posted at: <a href="https://rusi-ns.ca/defence-and-security-newsletter/">https://rusi-ns.ca/defence-and-security-newsletter/</a>. If you are interested in receiving the newsletter, email <a href="mailto:admin@duncom.ca">admin@duncom.ca</a>.

### **Events:**

To list an event in *Dispatches*, email the CIO by noon Thursday. RUSI(NS) events are by invitation only. If you are interested in attending and have not been invited, email <u>RUSINovaScotia@gmail.com</u>. RUSI(NS) events may be cancelled at short notice – email RUSI(NS) if there is a question of an event occurring.

Keep an eye out for changes to our events program, especially with speakers, for the next couple months due to the election. Whilst the 'caretaker convention' has not apparently been declared, it is evident from exchanges with federal staff that many are already following the convention's intent. For more info about the convention, see: "Guidelines on the Conduct of Ministers, Ministers of State, Exempt Staff and Public Servants During an Election" (<a href="https://www.canada.ca/en/privy-council/services/publications/guidelines-conduct-ministers-state-exempt-staff-public-servants-election.html">https://www.canada.ca/en/privy-council/services/publications/guidelines-conduct-ministers-state-exempt-staff-public-servants-election.html</a>).

**18 September,** Wednesday - Distinguished Speaker Major Erik Weigelin, 423 Maritime Helicopter Squadron, speaking about the first operational deployment of the CH148 Cyclone helicopter. 1130-1330. Royal Artillery Park Officers' Mess.

**6 November**, Wednesday - RUSI(NS) 2019 Remembrance Dinner. Evening, Royal Artillery Park Officers' Mess.

Declining Ship Numbers, Opportunities Causing Merchant Marine Talent Loss

https://news.usni.org/2019/08/22/buzby-declining-ship-numbers-opportunities-causing-merchant-marine-talent-loss

This article leads one to wonder what also is the state of the

Canadian Merchant Navy personnel situation. Probably not enough to offset much the state of the US Merchant Marine deficit if there was a call for mass sealift.

Leads one to wonder, too, what are sealift plans for the Canadian Armed Forces if there was a need. The ships and the mariners may just not be there.

----

In response to queries, several remarks have been made by Canadian mariners:

The issue in Canada is not so much a lack of ships as training. Manning problems for merchant navy personnel in Canada are starting to manifest as shortages of specialists, e.g., seafarers with tanker endorsements and polar code certification. And ship crews are being told they may not have a relief for scheduled time-off periods. We continue to hear that shipowners are laying ships up for short periods for lack of key personnel. Some of these requirements are bureaucratic. I know of one former CCG commanding officer with twelve years of service in 1200-class icebreakers in the Arctic being denied a polar code certificate because it wasn't 'recent,' i.e., in the last five years.

Many companies are now offering signing bonuses to new hires and to the company employee that found them.

We hear whispers that domestic shipping companies are pushing Transport Canada Marine Safety for changes to the shipping act to allow foreign officers and ratings. How would the Canadian Armed Forces like all of its military equipment to be moved by say Russian officers?

There is still sealift capability but using these vessels for military sealift might take them away from other important or critical roles like Arctic sealift, etc.

It's a very complex issue. Education of seafarers is a provincial matter yet they are regulated federally. And different regions of the country have different needs.

And this is just the beginning.

----

Recall the incident of Canadian military equipment including armoured vehicles being detained on an Ukrainian ship and having to be boarded by the Canadian Navy. We now only have a few ships like the SANDERLING (22,000 tonnes cargo vessel) under the Canadian flag.

----

Tax issues for both owners and seafarers also has an effect on the lack of interest to register ships in Canada or to sail in the few registered Canadian deep sea vessels.

Ground-Based Laser Weapon Scores 1st UCAV Combat Kill

## Army Recognition posted

(https://www.armyrecognition.com/weapons defence industry military technology uk/turkey uses laser weapon technology to shoot down chinese uav wing loong ii in libya.html), a report entitled "Turkey uses laser weapon technology to shoot down Chinese UAV Wing Loong II in Libya." The UAE-owned, Chinese-made UAV, Wing Loong II, was on an armed reconnaissance combat mission, seeking targets in the Misurata area eligible for engagement by a direct attack with its anti-tank missile.

The story is interesting for several reasons:

a. the multi-national properties of arms procurement and usage;

c. the actors involved (Libya, GNA, LNA, UAE, Turkey, China) are not usually characterized as military innovators.

If the reports are credible, this weapon, built by Turkey and employed by Libyan factions, is years ahead of US, Russian and UK deployment of equivalent systems.

iHLS commented (<a href="https://i-hls.com/archives/93986">https://i-hls.com/archives/93986</a>) that the Turkish system used in this 3 August engagement in Libya was mounted on an off-road armoured car chassis and equipped with a Turkish-made electro-optic guidance system that enables accurate target inspection with selection and holding of a vulnerable point until its unparalleled 50kW laser completely destroys the target. Two Turkish manufacturers, Aselsan and Roketsan, have sold production-standard DEW counter-UAS systems to unspecified customers.

This incident marks a new threat vector to MALE UCAV operations that is anticipated to proliferate rapidly outside the control of the ITAR regime.

Primary Source: <a href="https://www.linkedin.com/pulse/first-combat-kill-rpas-ground-based-laser-weapon-johnston-davis-cmgr/">https://www.linkedin.com/pulse/first-combat-kill-rpas-ground-based-laser-weapon-johnston-davis-cmgr/</a>

Ontario shipyard accuses federal government of unfairly stacking deck in Davie's favour

Ref: <a href="https://www.cbc.ca/news/politics/hamilton-heddle-shipyard-competition-1.5258089">https://www.cbc.ca/news/politics/hamilton-heddle-shipyard-competition-1.5258089</a>

"...Heddle alleges in its complaint that many of the requirements the government says shipyards must meet to qualify for consideration are not legitimate or reasonable — and will disqualify virtually every yard but Davie."

Is the requirements document something publicly available?

And what is the rationale behind the 1000 tonnes cutoff? That number is certainly in the National Shipbuilding Strategy (NSS) to divide building into two categories. Most boatyards, at least here in Nova Scotia, do not build above 250-350 tonnes anyways; they are limited by the capability of their marine railways. How many yards are there that can build in the 350-1000 tonnes bracket? That was not an issue when so many of the ships to be built under the NSS were much larger than that (7000 tonnes frigates, 25000 tonnes oilers, DFO/CCG patrol and research vessels of 2-3000 tonnes). Public reported only noted three yards, Irving, Seaspan and Davie, that could handle that large. If other yards are coming forward now, is it time to review the NSS? One (if not the) main purpose of the NSS is to ensure a robust (meaning not boom-and-bust) Canadian shipbuilding industry. There are a limited number of government ships (and dollars), so the implication is NSS will only support a limited number of yards (word is, two medium yards steady-state, three yards until we get there). So it is not desirable to distribute the ship contracts too widely. But if there are ships to be built in the, say 350-2000 tonnes range, maybe a third category of shipbuilding should be added to the NSS. It would not hurt either the three large shipyards or the many smaller ones (most boatyards anyways).

Army Explores Robot Decoys & Cannon-Fired Jamming Pods

RCAF to get more Cormorant helicopters, rest of fleet to be upgraded

https://ottawacitizen.com/news/national/defence-watch/rcaf-to-get-two-more-cormorant-helicopters-rest-of-fleet-to-be-upgraded

There is something missing in this news. There are at least five VH-72 helicopters acquired by Canada and now in storage that can be converted to the search and rescue configuration. They were the buy from the US Presidential fleet and may be convertible unless they have been cannibalized to the extent that they cannot be returned to flying status.

RUSI(NS) member remark: I do not believe any of the US choppers have been cannibalized at all. There are significant, but not insurmountable airworthiness issues robbing from them for installation on the CH149.

Arrowhead 140 – A guide to the Royal Navy's potential future frigate

https://ukdefencejournal.org.uk/arrowhead-140-a-guide-to-the-royal-navys-potential-future-frigate/

The Type 31e for the Royal Navy is meant to be at the low end of the range of frigate capabilities (greater, by definition, than a corvette). The Babcock proposal, with 100 ship's company and 28 knots speed, has aspects of a low end frigate, but at 5,700 tonnes and 138.7 metres in length, this is not a small ship! Size is not an indicator of a warship's type or capability.

# **Cunard RMS Samaria**

 $\frac{https://richcblog.blogspot.com/2005/03/cunard-rmssamaria.html}{samaria.html}$ 

Note the bit in the article about *Samaria's* bell at the mess at RA Park. It has been the custom at RUSI(NS) Remembrance Dinners to ring the bell to end the minute of silence recognizing fallen comrades.

Keep 6 November available to attend the dinner.

(RMS = Royal Mail Ship)
